

## **Fabric End Use Applications**

End use applications: “**Yes**” Indicates that fabrics have been used in the application specified.

**Indoor:** This indicates that the fabrics specified have been used in public buildings, places of entertainment, the retail sector, where either a non-flame retardant fabric or flame retardant fabric can be used dependent upon the specifying authority.

**Outdoor:** This indicates that the fabrics specified have been used for external applications that may include promotional flags and banners, signage and outdoor event banners.

**Flags:** Fabrics are suitable for flags intended to be flown either externally or internally and will provide the durability expected of a fabric used in that application or for large stadia flags where FR fabrics must be used.

**Stage / Theatre:** Fabrics specified can be used in theatrical applications such as scenic stage backdrops, and decorative drapes.

**Soft Signage / Retail:** This group of fabrics is typically used for retail soft signage at point of sale or point of purchase, window displays for product graphics and promotions.

**Display Banners:** This indicates that the fabrics specified under this heading are commonly used for display banners including pop-ups, roll-ups, hanging banners and even exhibition graphics where permissible.

**Light Boxes:** These fabrics can be used for illuminated light boxes for advertising purposes typically for promotional purposes and advertising campaigns dependent upon the FR integrity required by the specifying authority.

**Exhibition Graphics:** This group of fabrics have found uses in exhibition graphics for screening, hanging drapes, banners and many other applications associated with exhibition graphics where FR performance is often required.

**Interior:** These fabrics have found use in a number of the following interior applications including stretch canvas art reproduction, personalised soft filled products, occasional furniture, decorative hanging drapes, screening etc.

***This information is provided for guidance ONLY and the Customer shall determine the suitability of any of the fabrics supplied by Brook International for the intended end-use application.***

***Where fabrics are specified as **FR** (flame retardant) they conform to the standard applicable to that fabric that they have been tested against and certificates are available upon request.***

**DIGITAL PRINT TEXTILES from  
Brook International**
